

St. Louis' **back and shoulder pain** sufferers love the relaxing release of tension from pressure point therapy!

**S**tress creates tension and tightens up the muscles in your lower back and shoulders. The nerve energy in these areas is actually being interrupted and can cause problems including decreased mobility, discomfort or pain.

**Pressure Point Therapy** is an important development that naturally releases tension and leaves you feeling soothed and relaxed. You can have increased mobility and feel happier.

*"I noticed the results almost instantly!"*
